Project : Currency Converter App

Project overview,

The Currency Converter App is a web-based application designed to facilitate the conversion of various currencies in real-time. The app fetches up-to-date exchange rates and allows users to convert an amount from one currency to another seamlessly.

## **Key Features:**

### **1. Real-Time Exchange Rates:**

- The app uses the Currency Converter Library to fetch the latest exchange rates for different currencies.

### **2. User-Friendly Interface:**

- The app interface provides a straightforward form where users can input the amount, select the source currency, and choose the target currency.

### **3. Dynamic Conversion:**

- Upon user input, the app dynamically calculates the converted amount based on the selected currencies and the fetched exchange rates.

### **4. Result Display:**

- The converted amount is displayed to the user, providing a clear and concise output.

## **Usage:**

1. Users access the app.
2. Input the amount to convert.
3. Select the source and target currencies.

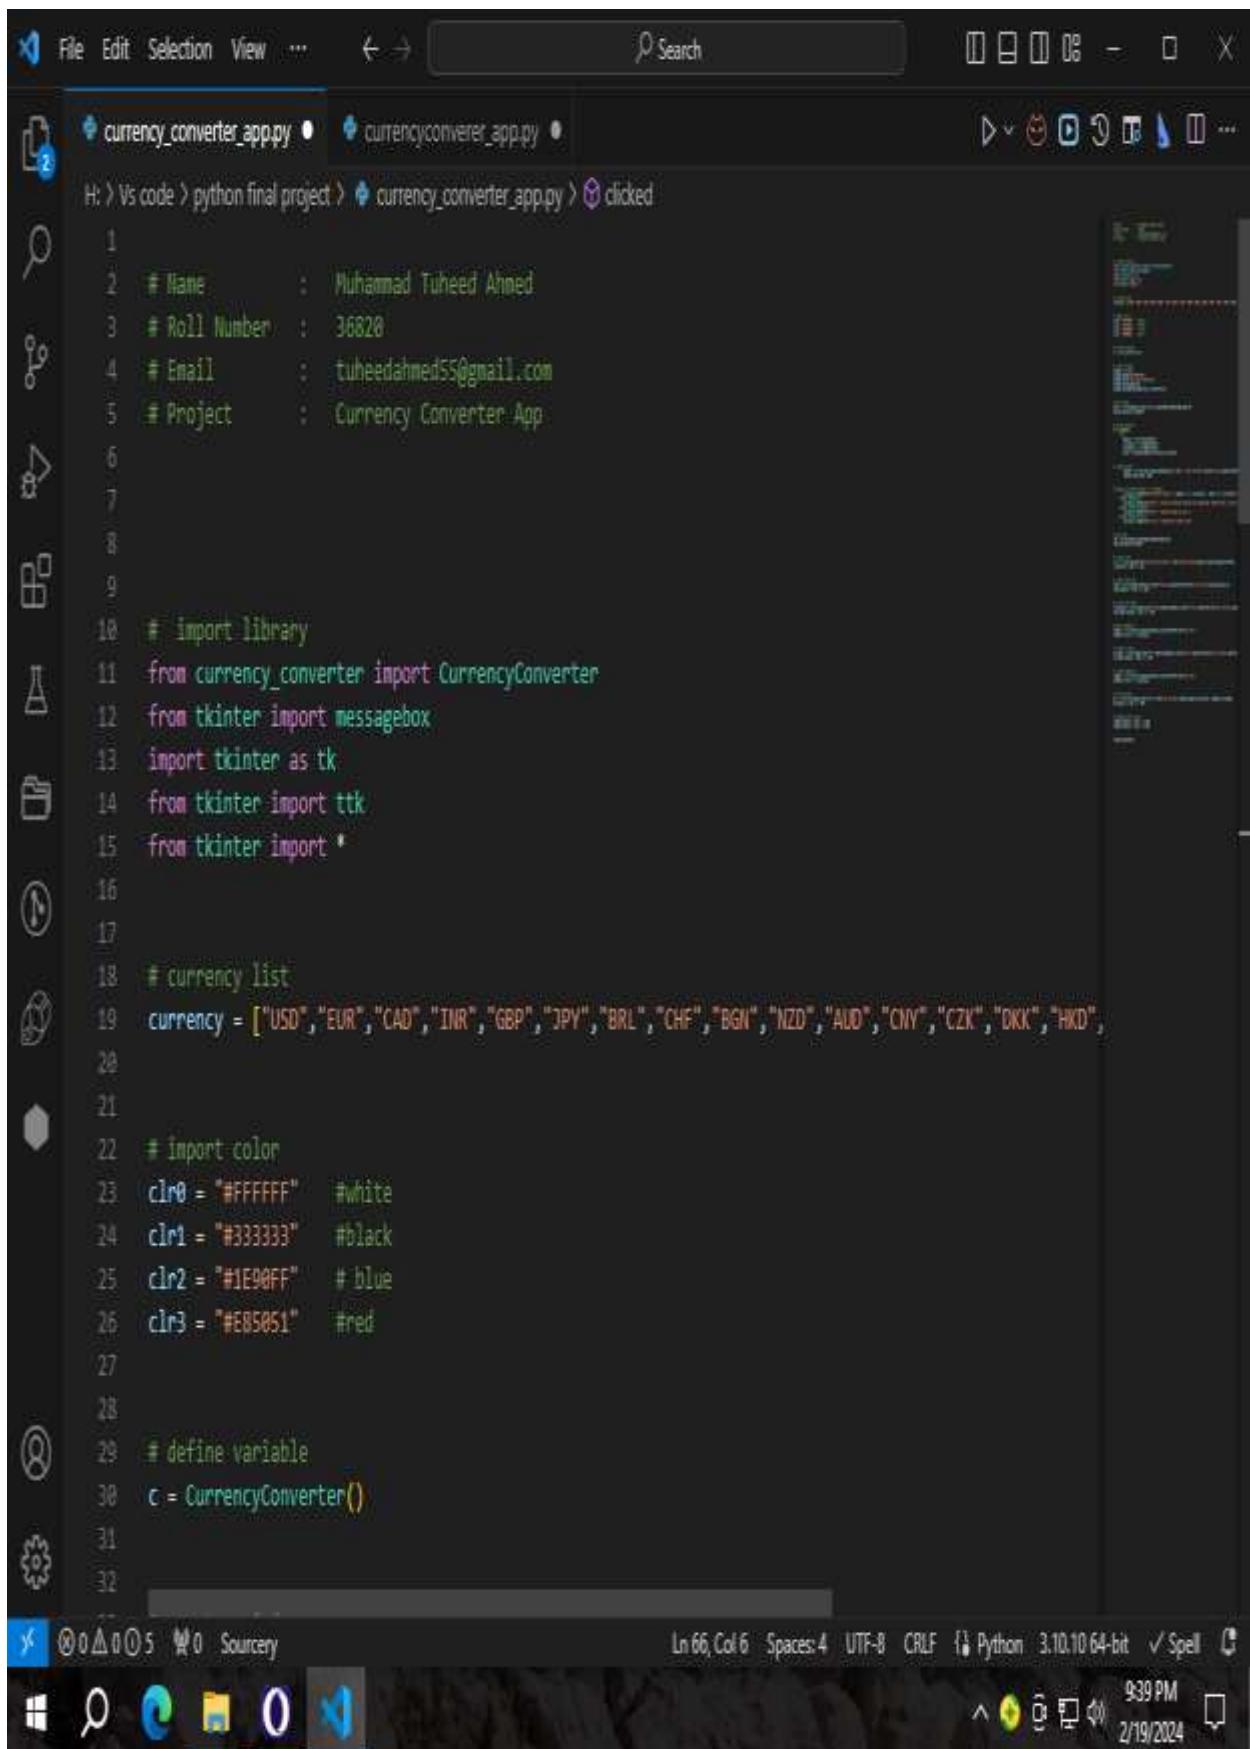

4. Click the "Convert" button.
5. The converted amount is displayed on the page.

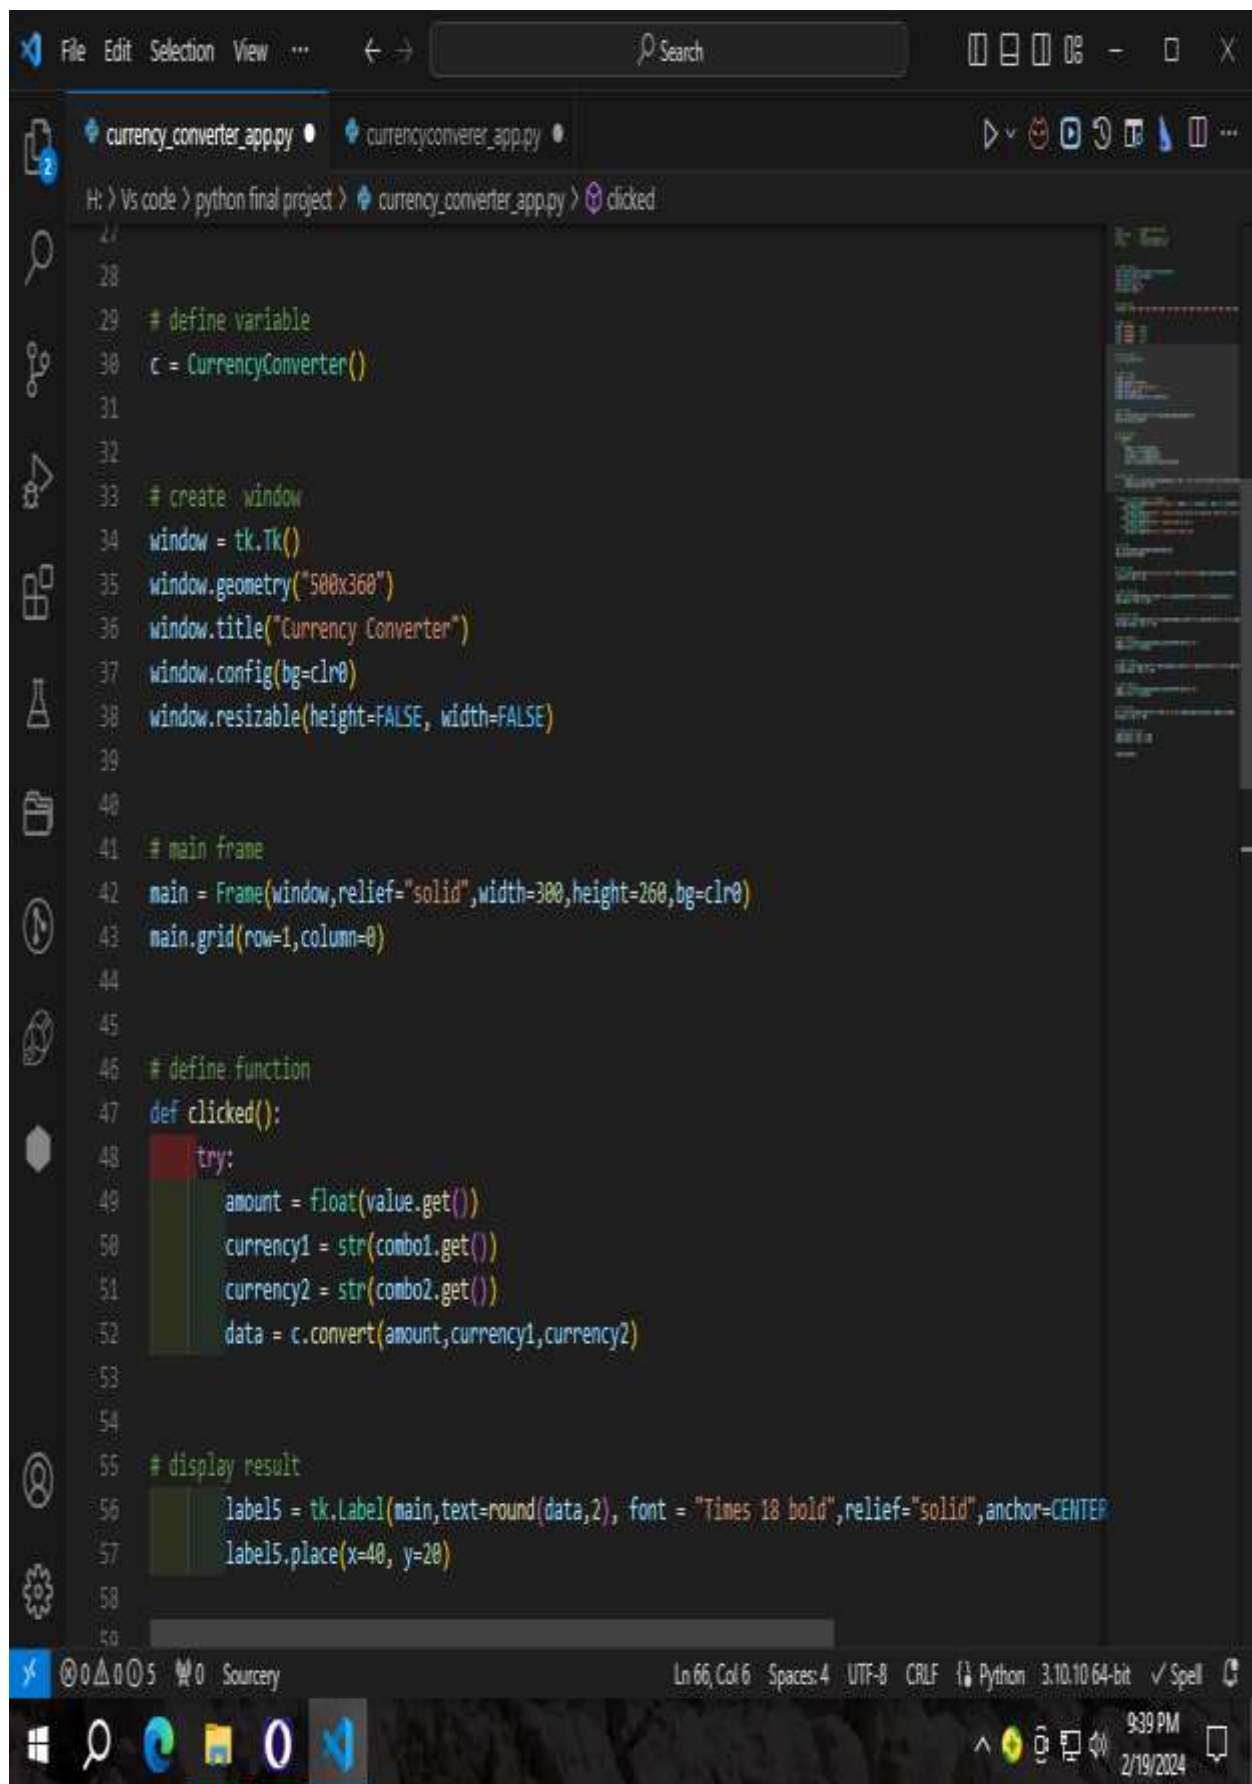

**Supported Currencies:**

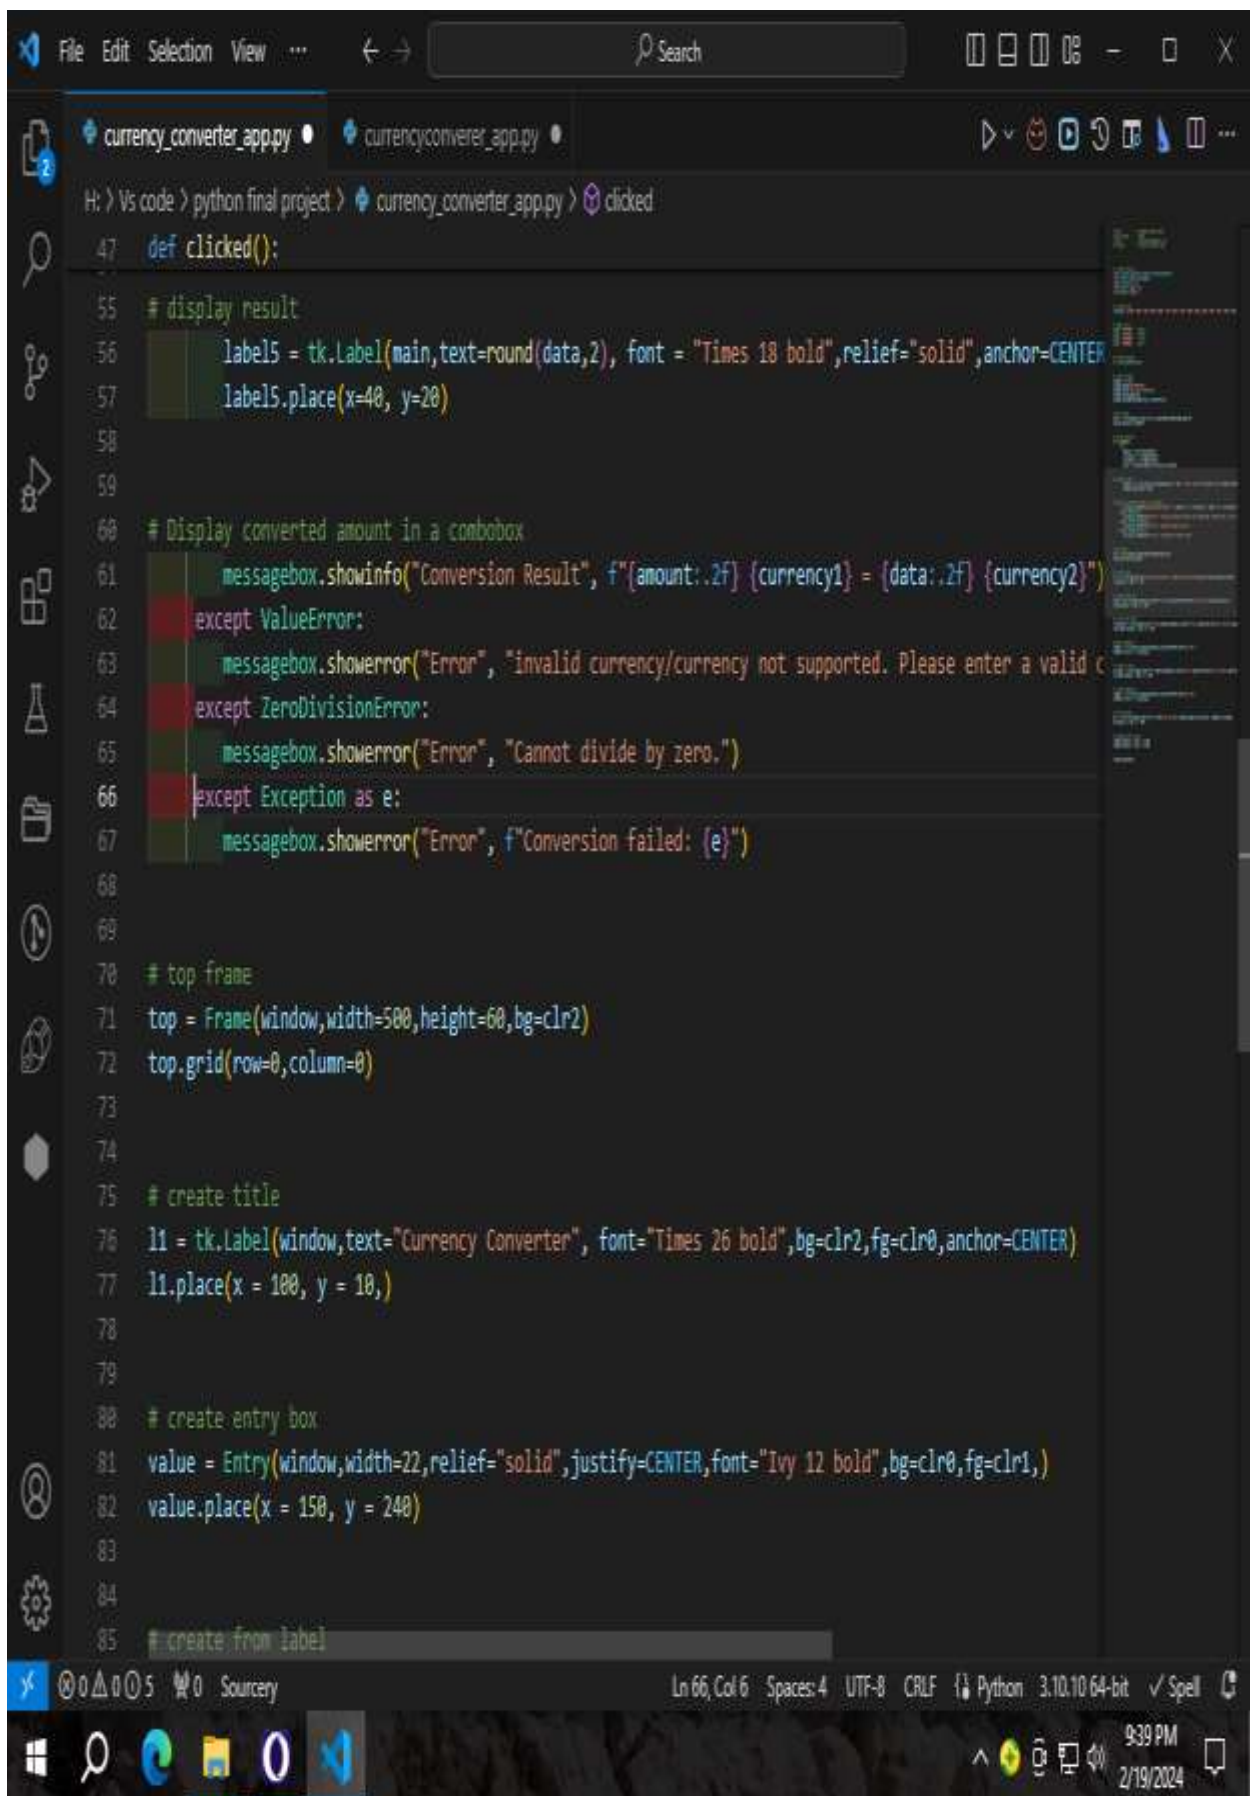

- United State Dollar (USD)
- Euro (EUR)
- Indian Rupee (INR)
- United Kingdom (GBP)
- Newzeland Dollar (NZD)
- Australian Dollar (AUD)
- Japaness Yen (JPY)
- Canadian Dollar (CAD)
- Brazil (BRL)
- Chiness Yuan (CNY)
- Bulgaria (BGN)
- Czech Republic (CZK)
- Denmark (DKK)
- Hong Kong Dollar (HKD)
- Hungary (HUF)
- Iceland (ISK)
- Indonesia (IDR)
- Korea (KRW)
- Switzerland (CHF)
- Malaysia (MYR)
- Mexico (MXN)
